

Econo-Coat®

1001 Powder Spray Booth

Ultra-compact powder spray booth/
recovery system for batch powder coating

Nordson Econo-Coat 1001 booth shown with optional poly canopy.

Nordson powder spray guns provide optimum coating performance.

Perfect Size for Coating Smaller Parts

The Nordson Econo-Coat 1001 powder spray booth system is a downsized version of its production-proven family of batch booths. Ideal for coating wheels and other automotive parts, test panels for new color evaluation, or any other parts that fit within its 3.75' H x 2.5' W x 2.5' D work envelope.

- Operates on 110-volt electrical supply for fast, easy installation.
- Small footprint for maximum space utilization.
- Reverse-pulse filter cartridge cleaning for peak performance and long service life.
- Final filter returns clean air to the workplace.
- Simple controls for ease of use.

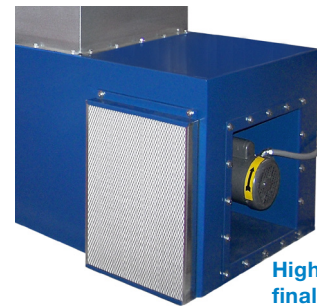

Proven Cartridge-Filter Technology

Nordson cartridge-filter powder recovery systems do not require expensive ductwork and explosion venting. Air used to contain and recover powder overspray passes through a primary cartridge filter and final filter, and is then exhausted as clean air.

Primary cartridge filter is cleaned using a reverse-pulse of air for maximum operating efficiency and extended filter life.

High-efficiency primary filter

High-efficiency final filter

Econo-Coat® 1001 Powder Spray Booth

Safe, Simple Operation

The Econo-Coat 1001 booth control panel includes:

- Power on/off switch
- Booth exhaust start and stop switches
- Cartridge-filter blow-down switch

Optional Powder Application Equipment

The Econo-Coat 1001 powder spray booth is designed for use with Nordson application equipment, such as the Encore® mobile powder spray systems.

Together, this package provides versatile, economical, high-performance operation to meet a variety of powder coating requirements.
